

ABOUT US

At Silverwing we believe in “**Single Solution Fits None**” philosophy. Since every child has a different way of learning, we have different ways of coaching. This makes it very easy for any student to grasp and adopt technological learnings. Our faculties are well versed with practical coaching methodology. We avoid to use traditional pen and paper approach, every learning here is funcentric learning.

The promoters of the organisation are equipped with a total 25+ years of coaching experience with premier institutes of the country including IIMA-CIIE, Nirma University, PDPU, BITS Pilani, Cogniznt, TCS and L&T.

We not only focus on IT learnings but also indulge into developing life skills of the child by involving them into various activities like creative reading, public speaking, problem solving etc.

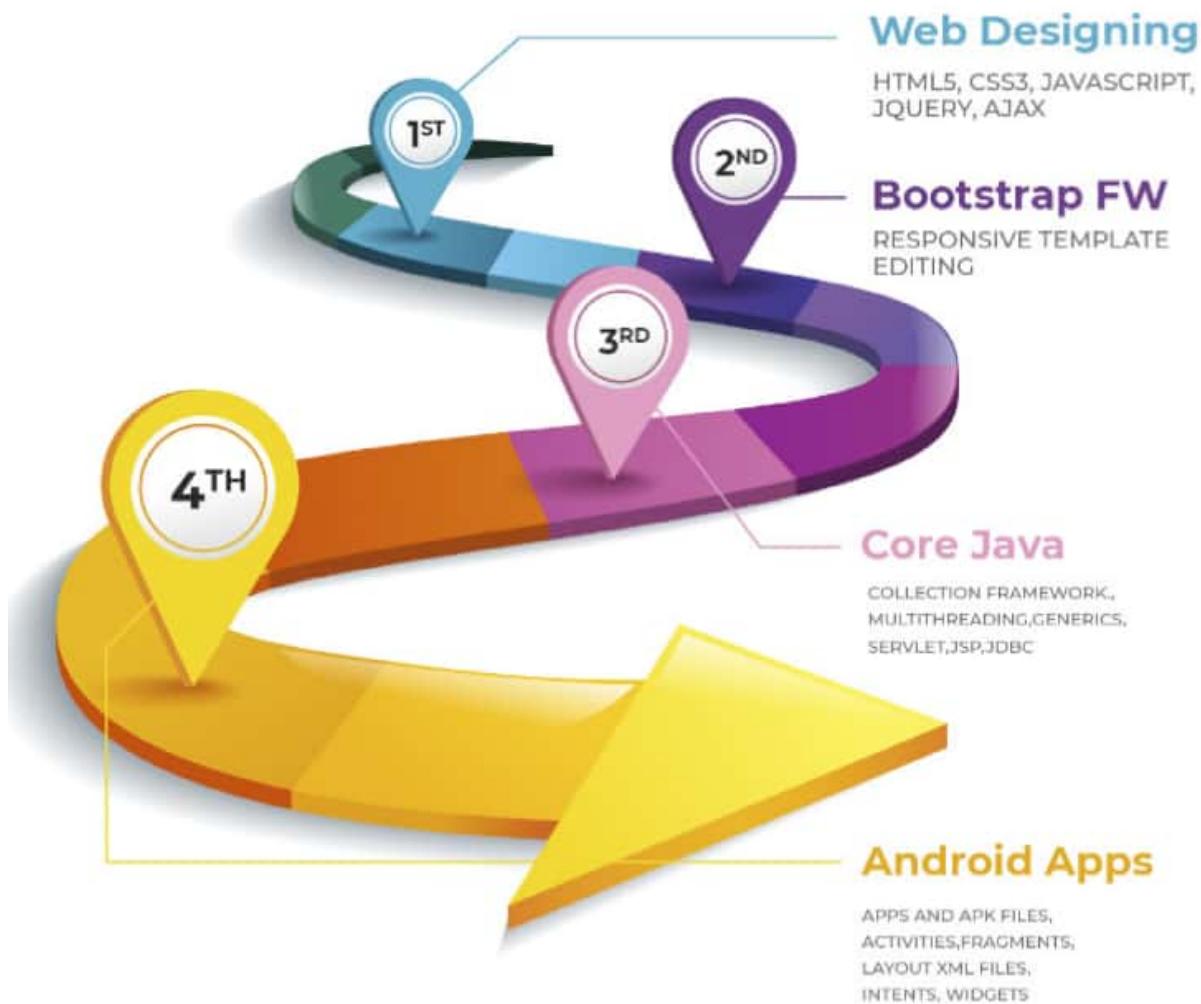

| At Silverwing,
“Enters a Student, Leaves a Leader”

FAQ

■ WHAT IS CODING ?

On the most basic level, coding is communication with computers, and what we use to build and run websites, apps, games, and more. Learning to code is like learning to speak and write in a particular language a computer's language.

■ WHY CODING ?

STEM is the new way world is moving to. A very big portion of opportunities are in STEM and is growing significantly year by year. Coders are extremely in demand in STEM field hence early coding will be just perfect start to a super career in Future

■ WHO ARE YOUR INSTRUCTORS AND HOW DO YOU SELECT ?

All of our instructors are tech-savvy adults, having development background. And importantly, each one of them keep developing apps and software on regular basis. every one of them is passionate about STEM education and passing on their best knowledge to your student. In terms of hiring and coaching preparation, we conduct rigorous selection and training procedures.

FAQ

■ WHAT ARE THE BENEFITS OF LEARNING CODING?

- Coding is the new literacy.
- Coding facilitates creativity.
- Coding will teach perseverance to kids.
- Kids can start developing computational skills.

■ WHAT IS THE BEST AGE TO START LEARNING CODING?

Earlier the better! From age 7 a child would be able to understand the concept of programming and would be able to generate algorithms.

■ WHAT TYPE OF VALUE WILL MY STUDENT RECEIVE FROM CODING?

First of all, learning at Silverwing is much different than learning anywhere else. Not only is curriculum presented in a fun, unconventional, "un-school" manner (students have the freedom to create and build whatever comes to mind) but the experience is also personalized at kid's pace. In addition, curriculum is designed to promote 21st century skills, and those skills are immediately applicable to the real world, both inside and outside the classroom.
